

function pertaining to the creation or manipulation of a compilation of content selected from the plurality of content entities by the user, wherein the plurality of function modules receives requests from the user via the user interface and returns information concerning the compilation of content.

C2 6. (Twice Amended) A program storage device readable by a machine, tangibly embodying a program of instructions executable by the machine to perform method steps for facilitating creation and manipulation of compilations of content selected by a user, comprising the step of:

providing a functional layer for interfacing over a network with the user via a user interface and interfacing with a data repository containing a plurality of content entities, the functional layer comprising a plurality of function modules, each module for executing a function pertaining to the creation or manipulation of a compilation of content selected from the plurality of content entities by the user, wherein the plurality of function modules receives requests from the user via the user interface and returns information concerning the compilation of content.

C3 11. (Twice Amended) A system for facilitating creation and manipulation of compilations of content selected by a user, comprising:

AMENDMENT UNDER 37 C.F.R. § 1.111
U.S. Application No. 09/489,605
Attorney Docket No. A8514

a functional layer for interfacing over a network with the user via a user interface and interfacing with a data repository containing a plurality of content entities; and

a plurality of function modules in the functional layer, each module including means for executing a function pertaining to the creation or manipulation of a compilation of content selected from the plurality of content entities by the user, wherein the plurality of function modules receives requests from the user via the user interface and returns information concerning the compilation of content.
